RESEARCH STATEMENT

My research focuses on sustainable HCI and human-nature interaction to address challenges associated with climate change. Specifically, I investigate collaborative making, experimental farming, and environmental sensing—all standing in the intersection of human activity, computing, and the biosphere. Building on my background in design, my research combines qualitative social science methods such as ethnography, interviewing, and observation, as well as arts-and-design approaches, such as research through design and speculative design. As a technology and design researcher, my goal is to develop new theories, methodologies, and applications for sustaining both human and non-human life.

RESEARCH EXPERIENCE

Jan 2020 – May 2020 Research Intern, Snap Research. Seattle, WA, USA
Surveying, designing, and prototyping technologies to enrich and augment in-person interactions; identifying product development opportunities and design strategies for Snap; outlining design guidelines for collocated interactions.

May 2019 – Aug 2019 Research Intern, Microsoft Research. Redmond, WA, USA
Designed and conducted qualitative field research to study the experiences, perceptions, and implicit knowledge people have with the air and air pollution. Proposed actionable design strategies of augmenting environmental measurements to encourage behavior change.

Aug 2016 – Dec 2018 Graduate Research Assistant, SICE. Indiana University, Bloomington IN, USA
Designed and led ethnographic fieldwork (observations, interview, design probes, and digital ethnography) on experimental farming and bottom-up innovation in rural Taiwan and American Midwest. Proposed strategies to design for multispecies collaboration and cohabitation.

Mar 2015 – May 2016 User Experience Researcher / Designer, ASUS. Taipei, Taiwan
Led user studies and cross-functional co-design workshops to identify the user, technology, and business trends that directly influenced ASUS’s 3-10 years roadmap. Collaborated closely with project managers, marketers, designers, and engineers to deliver better user experiences.
Mar 2014 – Mar 2015  **Product Designer, ASUS**, Taipei, Taiwan
Led the design of the award-winning Google On-Hub router and VivoMini PC; involved in the entire product development process from ideation to mass production. Brainstormed use case scenarios and prototyped design proposals on various pioneering products/services.

Sep 2010 – Dec 2013  **Graduate Research Assistant, College of Design**, Taiwan Tech, Taipei, Taiwan
Assisted in brainstorming and creating 3D prototypes to study load bearing structure using sheet material. Designed and conducted anthropological fieldwork to identify strategies of improving user experiences in product design.

May 2010 – Dec 2010  **Research Assistant, College of Design**, YunTech, Yunlin, Taiwan
Conducted and analyzed semi-structured interviews with design practitioners to investigate the mechanisms of creativity. Project funded by National Science Council, Taiwan.
